

# Freeing you from the burden of firewall management and safeguard your critical web assets with experts

Protecting your data, business assets and confidential corporate information from being accessed by unauthorized persons, has always been important for any business. Today with everything online, deploying firewalls to protect your enterprises and web application is even more important. But monitoring and managing your firewalls 24x7 can be both resource-intensive and time-consuming, yet it is essential.

# Relieve your burden

Our HKT Managed Firewall and Managed WAF Services can relieve you of the management and monitoring burden and put your mind at rest that your material is safe.

## Keep up with the latest threats

We will ensure that your devices are provisioned, deployed, upgraded and patched to keep up with the latest threats.

## Extend your security team with our expertise

Facing the cybersecurity talent shortage, our local expertise means you do not need to hire extra staff, and you can keep your existing staff focused on your business.

## Continuous monitoring 24x7

Your firewall will be managed and monitored 24x7. You will be kept up to date on its health and performance trend. You can then enjoy our expert personnel for configuration, upgrades and patching and monthly reporting.

## Fast response to threats

By continuously monitoring your firewall and WAF, our Next Generation Security Operations Centre (NG SOC) can correlate security events across your environment and assess any threats by using our "glocal" cyber threat intelligence. Check our Threat Management Services for more security support.

**Lift your cybersecurity posture and maximize the value of your firewalls investments**
