

## Take the burden of cybersecurity off your shoulders

Nowadays cybersecurity threats are a constant worry for every company of every size. Month by month, they become more dangerous, more sophisticated and harder to combat. No company is immune, and the risks cannot be ignored. At HKT we understand the problem and our Threat Management Services (TMS) are set up to take the entire burden of cybersecurity off your shoulders.

# Cutting-edge solutions

By utilizing the latest security technology, a vast database of local and global cyber threat intelligence, and our local teams of professionally certified security experts, we are able to analyze, track down and eliminate any cyber threats to your company.

Complying with the regulatory requirements across all three jurisdictions of the Greater Bay Area while also ensuring the cybersecurity of your business can be quite challenging. That is where we can help. If you experience even a hint of a threat, our locally-based professionals at our three Next Generation Security Operations Centers (NG SOC) in Hong Kong, Macau and Guangzhou will respond immediately to recommend and execute the most effective solution to combat the threats, without any time lapse or language barriers.

## Proactive and adaptive security

We built our NG SOC platform using advanced technology from multiple leaders in global cybersecurity. The cutting-edge platform allows us to provide proactive, highly adaptable security to give worry-free way to secure your company.

## Professional Incident Response and Forensics

What could be better than enjoying the finest globally-proven technology together with professionally-trained local expertise? With our range of robust resources, we can provide you with a variety of solutions and methods to combat cybersecurity risks and ensure you enjoy expert resolutions with no time lapse or language barriers.

## 24x7 Cybersecurity support

The huge demand for cybersecurity talent means that genuine experts are thin on the ground at the moment. Our services offer you a unique opportunity to close the loop on people, processes and technology, with expert local security support delivered 24x7 by experienced, well-trained, and well-equipped security professionals.

## Take control of your cybersecurity now

By utilizing our cutting-edge technology and expert round-the-clock local professional support, you can build a protective shield against even the most sophisticated cyber attacks.
