

HKT Multi-Cloud Solutions

The Ideal Architecture For Your Digital Transformation

Choosing the right cloud for each application as part of a successful digital transformation can be a challenge for any company. Our meticulous evaluation and hybrid or multi-cloud planning strategy, can help you plan, implement, and optimize every aspect of a powerful multi-cloud architecture. We cover everything from network, to infrastructure, and application to security, to give you ideal end-to-end multi-cloud solution.

UNIFIED EXPERIENCE ON MULTI-CLOUD

CONNECTIVITY

We provide software-defined managed network connectivity to connect with multiple public clouds via a direct private connection with guaranteed bandwidth, low latency and enhanced privacy.

SECURITY

We offer a cutting-edge platform to protect your business against cyber threats. This includes proactive, highly-adaptable protection, and cyber security forensics with local and global threat intelligence for your on-premise and multi-cloud infrastructure.

MONITORING

We monitor all your resources and applications across dynamic and distributed infrastructures through a unified and easy-to-manage portal. This provides real-time intelligence, based on actual user experiences, that can be analyzed to give you useful insights on your entire IT system.

MANAGED SERVICES

Our certified experts across multiple public clouds can help you plan, design and migrate, to a new multi-cloud environment. We will support your enterprise from on-boarding, to on-going multi-cloud operations with a full-range of managed services.

MULTI-CLOUD INFRASTRUCTURE

ALL-ROUND EXPERTISE

Apart from our own carrier-grade public cloud and managed private cloud services, we have strong partnerships with industry leaders and also have certified experts for the above leading cloud technologies.

UNBIASED CONSULTANCY

Our specialists will evaluate your current situation and provide unbiased consultancy to design and implement the best-fit architecture across multiple public and private cloud services for your enterprise, so you can plan ahead for continuous growth.

YOUR TRUSTED MULTI-CLOUD PARTNER

We assist you at every stage of your cloud journey with continuous support throughout your planning, implementation and optimization.
