HIKVISION[®]

ABOUT US

Founded in 2001, Hikvision focuses on integrated security and scenario-based digitalization. Propelled by the AI-powered Internet of Things (AIoT), the Company remains committed to serving various industries with its machine perception and artificial intelligence technologies. Guided by the core values of 'Professionalism, Reliability, and Integrity', Hikvision explores innovative ways to better perceive and understand the world.

It empowers visionary decision-makers and practitioners to work together to enhance safety and advance sustainable development around the world. The Company's business grows through technologies that are deeply rooted in innovation and an increasingly diverse range of AIoT products and solutions. With an open ecosystem, Hikvision is empowering the industry and advancing with its partners. The Company currently provides products and services to over 180 countries and regions. In 2024, Hikvision's revenue was RMB 92.50 billion (USD 12.87 billion).

HUAWEI AI-POWERED NETWORK INNOVATION

Huawei Xinghe Intelligent Network intelligently connects everything, fully unleashing intelligence and computing power to accelerate intelligent transformation in every industry. Huawei Xinghe Network Solution provides customers with E2E integrated network services. The solution focuses on four parts:

- 1. Xinghe Intelligent Fabric:** In the data center general-purpose computing scenario, a data center network must be stable, reliable, intelligent, and secure using AI technologies to ensure service continuity. In the intelligent computing scenario, data centers with high computing capacity, efficiency, and availability are built to unlock computing power.
- 2. Xinghe Intelligent WAN:** High-capacity converged WAN and an intelligent converged IP network foundation can be built through full-service convergence to achieve deterministic experience and optimal O&M experience.
- 3. Huawei Xinghe Intelligent Campus:** AI enables experience-centric network construction to upgrade wireless, application, O&M, and security experience and improve enterprise productivity.
- 4. Xinghe Intelligent Network Security:** AI enables network security protection capabilities to implement a SASE solution featuring intelligent detection, intelligent correlation, and intelligent convergence, building a defense line for enterprise networks.

Gold Sponsor

Amazon Web Services (AWS) is the world's most comprehensive and broadly adopted cloud, offering over 200 fully featured services from data centers globally. Millions of customers—including the fastest-growing startups, largest enterprises, and leading government agencies—are using AWS to lower costs, become more agile, and innovate faster.

Gold Sponsor

At Check Point, our vision is to secure the hyperconnected world in the AI era. We employ a dual strategy: providing robust security for AI systems while leveraging AI to enhance our security measures. Our approach combines real security solutions with a comprehensive platform for real-time threat prevention. By integrating AI across all aspects of cybersecurity, we ensure advanced protection against emerging threats.

Join us to explore how our innovative AI-driven solutions can safeguard your organization's data and infrastructure, enabling a secure digital transformation in an increasingly interconnected world. Experience the future of cybersecurity with Check Point.

Gold Sponsor

Cisco AI Defense is an advanced cybersecurity solution designed to proactively detect, analyze, and mitigate sophisticated threats in real time. Powered by cutting-edge artificial intelligence (AI) and machine learning (ML) technologies, Cisco AI Defense enhances an organization's ability to secure its digital infrastructure against evolving cyber risks. By leveraging enriched telemetry data, behavioral analytics, and automated threat intelligence, the solution provides unparalleled visibility into encrypted and unencrypted traffic without compromising privacy.

Palo Alto Networks Cortex Xsiam - The **#1 AI-Driven SecOps Platform**. The only security operations solution you need, consolidating all of your data and tools into a single AI-driven platform Evolved.

Gold Sponsor**Red Hat****veeam**

After two years of trial and error in Gen AI, the market already has a better understanding of Gen AI use cases, and companies have started to deploy Gen AI applications in production. Due to costs and data sovereignty, many companies prefer to deploy Gen AI in their own environments. AI applications also contain data that can be a target of ransomware attacks. In this session, Red Hat Ray and Veeam Chris will talk about the typical architecture of running an in-house Gen AI application and the data protection strategies to safeguard Gen AI applications against ransomware attacks.

Gold Sponsor**SANGFOR**

Sangfor Technologies is a leading global vendor of IT infrastructure solutions, specializing in Cloud Computing & Network Security with a wide range of products & services including Hyper-Converged Infrastructure, Virtual Desktop Infrastructure, Next-generation Firewall, Endpoint Protection, Secure Web Gateway, Network Detection & Response, Secure Access Service Edge, Anti-Ransomware, Managed Detection & Response, and many others.
