d. Voicemail

You can view and listen to the voicemail in the app.

FAQ

Q1. How to change the display name of the users in my company?

A1. You can access to the “admin portal” to change the display name of different phone nos. Please refer to the welcome letter for “admin portal” login URL as well as the login credentials.

Q2. Can I go directly to the “Calling” page when I launch the Webex app?

A2. Yes, just a few steps.

Tap your **Profile**, go to **Settings**, select **General** and **Landing screen**. You can select the preferred Landing screen (Select to Calling, Contacts or Search page)

Q3. Can I apply fingerprint or face recognition to enhance security in the Webex app?

A3. Yes. To have an extra layer of security, you can use biometric authentication, such as a fingerprint or facial scan, to quickly reopen the app.

The flow of setting up fingerprint or face recognition:

Tap your **Profile**, go to **Settings**, select **Privacy**, then tap **Use Face ID Authentication** (or **Use biometric authentication** in Android device)

Follow the onscreen instructions to set up your device's biometric security settings. Example: iOS device

To reopen the app from the app lock screen, glance at your device to use face recognition, if the app lock passed, it will direct you to landing page.

If your device fails to recognize your fingerprint or facial scan, enter your passcode or security pattern.

Q4. Any information related to port information on firewall configuration for Webex service?

A4. Yes, please refer to below table:
